

ARSIL MALEK

Full-Stack (MERN) & AI Developer

Ahmedabad, India · +91 91061 85130 · arsil8356@gmail.com

Portfolio: arsil-theta.vercel.app · linkedin.com/in/arsil-malek · github.com/CodArsh

PROFESSIONAL SUMMARY

Full-Stack (MERN) & AI Developer with **5 years of experience** designing, building and operating production software completely end to end — architecture, frontend, backend, mobile, databases, AI integration, cloud infrastructure and deployment — single-handedly. Currently own **two revenue-focused SaaS products live on the Shopify ecosystem** (GEO Studio & RapidSales) and have delivered **10+ React Native applications** to the Google Play Store and Apple App Store across e-commerce, EV, medical, and social domains.

Specialized in **AI engineering**: LLM integrations (Claude, GPT, Gemini), AI agents and automation pipelines, WhatsApp business automation, human-like AI voice calling, and Generative Engine Optimization (GEO). Stack-agnostic by mindset — able to pick up any new technology and ship production-grade work within days, without supervision or a supporting team.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Full Stack & AI

Hashtechy Pvt Ltd, Ahmedabad · Jul 2024 – Present

- Conceived, architected, built, launched and now operate **two SaaS products live on the Shopify App Store** (GEO Studio and RapidSales) — owning every layer: React/Remix frontends, Node.js backends, PostgreSQL/Supabase databases, AWS EC2 infrastructure, billing, and App Store review compliance.
- Designed and shipped **AI-driven automation systems**: WhatsApp campaign engines, email sequencing, abandoned-cart recovery flows, and human-like AI voice calling integrated into a unified sales dashboard.
- Built a **WooCommerce companion plugin** (PHP + REST) with a self-service store-connect flow, expanding one product from Shopify-only to multi-platform with a shared backend.
- Lead **React Native development for enterprise clients** — an EV charging platform with live station maps, real-time charging sessions over sockets, Razorpay payments, and Google Maps integration.
- Completed a major **React Native 0.74 → 0.81 upgrade** across 40+ native dependencies, achieving Android 15 and Google Play 16 KB page-size compliance for continued store distribution.
- Run production operations independently: PM2/Nginx on EC2, database migrations with zero downtime, webhook debugging against third-party platforms, and cost-tier optimization across cloud providers.

React Native Developer

Groovyweb Pvt Ltd · May 2022 – Feb 2024

- Delivered **Android and iOS applications for international clients** across e-commerce, medical, dating and marketplace domains — from UI implementation to store submission.
- Integrated **payment gateways, Firebase services** (auth, Firestore, push notifications, analytics) and REST APIs backed by Node.js/MongoDB services.
- Owned **performance optimization**: list virtualization, image pipelines, bundle-size reduction and smooth 60fps animation work on mid-range devices.
- Handled **complete release cycles** — code signing, Gradle/Xcode build configuration, Play Console and App Store Connect submissions, and post-release crash triage.

FEATURED PRODUCTS — BUILT & OPERATED SOLO

GEO Studio — AI Search Visibility Platform

geostudio.app · Live on the Shopify App Store · Node.js · React/Remix · PostgreSQL · LLM APIs · AWS

- The world's first "GEO executor" — analyzes how ChatGPT, Claude, Perplexity and Gemini read, interpret and rank a brand's store, produces an AI-visibility score, and hands merchants ready-to-ship fixes.
- Built the crawling/scoring engine, merchant dashboard with visibility analytics, free GEO-score lead funnel, trial/subscription billing, and staging + production environments on AWS EC2.
- Passed Shopify App Store review and launched publicly; operated with real merchant installs since day one.

RapidSales — AI Sales Automation Platform

rapidsales.ai · Live (Shopify + WooCommerce) · Node.js · Supabase (PostgreSQL) · WhatsApp API · AI Voice

- Unified sales dashboard that automates Email, WhatsApp and human-like AI voice calls for D2C brands — tri-channel outreach, smart lead handoff and a single customer timeline.
- Engineered abandoned-cart recovery integrated with Razorpay Magic Checkout, webhook-driven order sync, and event pipelines handling every-minute scheduled jobs in production.
- Extended the platform to WooCommerce with a self-service connect plugin (v0.2.0, 37/37 automated tests passing) sharing one multi-tenant backend; executed a zero-downtime production database migration.

SELECTED PROJECTS

- **MegaCharge** — EV charging station app — live station discovery on maps, real-time charging sessions (socket-driven status, meter values), wallet and Razorpay payments, booking flows. React Native · Node.js · Socket.IO
- **Salafi Times** — Prayer-times and mosque announcement app with end-to-end push notification pipeline built on Firebase Cloud Functions and FCM. React Native · Firebase
- **Dottie** — Inclusive dating application designed for people with disabilities — accessibility-first UX. React Native · Node.js
- **Oculabs** — Medical application for remote eye-care diagnostics and patient tracking. React Native · REST APIs
- **Gripit · Sparepart Wale · Aparna** — E-commerce platforms and marketplaces — checkout, catalog search, order management. React Native · MERN · Firebase

KEY ACHIEVEMENTS

- Took **two SaaS products from zero to live on the Shopify App Store** as a solo engineer — including one approved by Shopify review within days of submission.
- Delivered a **major React Native version upgrade (0.74 → 0.81)** across 40+ native dependencies to meet Google Play's Android 15 / 16 KB page-size mandate — unblocking store distribution for a client fleet.
- Consistently productive in **unfamiliar stacks within days** — PHP/WooCommerce plugin development, Remix, Supabase and AI voice APIs were each learned and shipped to production inside a single sprint.

TECHNICAL SKILLS

Frontend	React, Remix, TypeScript, Redux, Framer Motion, Tailwind CSS
Backend	Node.js, Express, REST APIs, Socket.IO, JWT/OAuth, webhooks, Razorpay, Stripe, PHP
Mobile	React Native (iOS & Android), Firebase, FCM push, maps, native modules, store releases
Databases	MongoDB, PostgreSQL, Supabase, Firestore, Prisma, Mongoose, migrations
AI & Automation	Claude / GPT / Gemini APIs, AI agents, prompt engineering, WhatsApp automation, AI voice, GEO
Cloud & DevOps	AWS EC2, Vercel, Render, PM2, Nginx, cron systems, Git/GitHub, CI/CD
